Nov 1st Meeting start time 4:00
Team told Dr. Kang what each person will present to the jpl team.

Nov 3rd Meeting start time: 4:30pm Jpl group joined at 4:41

Front-end Team:
  Front end team showed the first draft demo. Add,delete, edit
    Shan- Would it be possible to put two points on the same lon and lat but different alt would i work?
  Front- Yes that is possible. Also showed him that it is possible.

Back-end Team:
  Back-end team demo-ed the rendering part of the project. Importing obj creating rendering and animating the scene 10 sec video.

Angel showed his demo. Spice / Python
  There are 3 radii, the model has 3 different radii. Planetary give you the position of the center of the planets orbiting the sun, you also need rational Ephemeris To show how mars is spinning. We need three different SPK files: generic, mars and Ephemeris.
