

Select a course from [Coursera](#), [EdX](#), or [Udacity](#). The course must be approved in advance and at the level of one of our 400/500 courses.

Each week each student will present an informal summary of the course videos and explain the worked homework assignment for that week. (It's ok for two or more students to take the same course and to work together on the presentations and homework.)

There will be no midterm or final. The course grade will depend on completion of the selected course and on the weekly presentations.

This is an opportunity to learn the material in a course of your choice and to gain exposure to material in courses others are taking.
