The Industry of Cyber Security

A career demand across majors

Tuesday, January 14th, 2014
3:15 – 4:15 PM
Salazar Hall, Room C358B

"Amid growing concerns about network vulnerability, the demand for cyber security experts grew 73% during the five years from 2007 to 2012, according to Burning Glass. The demand for all 'computer' jobs grew 20%, and the demand for all jobs grew just 6%, according to the firm. **Compensation for cyber security experts, including engineers, analysts, managers, architects and others, averaged $101,000, based on advertised salaries.** That was well above the compensation offered for the average IT job, which was about $89,000, according to the report."

- "Demand for Cyber Security Jobs is Soaring", Steve Rosebush, Deputy Editor, CIO Journal, WSJ, March 4, 2013.
