

# Earthquake System Science + Information Technology

# INTERNSHIPS

Summer Research Opportunities  
with the  
Southern California Earthquake Center

## SURE Internship

Summer Undergraduate Research Experience

### DESCRIPTION

Conduct field, laboratory, and/or theoretical research under the supervision of leading scientists in the fields of geophysics, earthquake geology, seismology, computer science, tectonics, and geodesy.

### TERM & LOCATION

- 8-10 week summer program
- Various SCEC institutions

### CANDIDATES

- Typically Earth Science majors, Junior and Seniors level
- U.S. citizens or permanent residents

## UseIT Internship

Undergraduate Studies in  
Earthquake Information Technology

### DESCRIPTION

Collaborate between teams using information technology to develop technical tools for scientists, educators, and policy makers about earthquakes, faults, seismic hazard mitigation, and earthquake risk reduction.

### TERM & LOCATION

- 8 weeks, typically June-August
- USC campus (Los Angeles, CA)

### CANDIDATES

- All Majors
- All undergraduate years
- U.S. citizens or permanent residents
