

Rubrics Software Engineering - Evaluation

This rubric is evaluated in CS 3337 and CS 4962.

1	2	3	4	5
Functional Evaluation 				
No systematic evaluation of the functional requirements listed in the Software Requirements Specification (SRS).	Some functional requirements listed in the Software Requirements Specification (SRS) are evaluated.	Major functional requirements listed in the Software Requirements Specification (SRS) are evaluated.	Most functional requirements listed in the Software Requirements Specification (SRS) are evaluated.	All functional requirements listed in the Software Requirements Specification (SRS) are evaluated.
Comparative Evaluation 				
No comparison of the implemented solution to existing solution(s).	Some comparison of the implemented solution to existing solution(s).	Comparison to existing solution(s) in some aspect such as design, features, effectiveness, and/or efficiency.	Comparison to existing solution(s) in multiple aspects such as design, features, effectiveness, and/or efficiency.	Comprehensive comparison to existing solution(s) in multiple aspects such as design, features, effectiveness, and/or efficiency.
